

José Antonio Silva

Front-end Developer

About

+1 year of experience as a web developer. I specialize in JavaScript, React and TailwindCSS to create beautiful user experiences. I have been in charge of the implementation of structure, web interface design, database creation, development of functionalities, error correction, application implementation, maintenance and updating of tools.

+8 years of experience as a technician, providing user support, specialized in repair, configuration and installation of hardware and software for PCs and printers, network management, management of ERP Mapics, creation of users with Active Directory, internal email management with Lotus notes.
